

May 16 2008 News Letter

Brought to you by [www.RMRoberts.com](http://www.RMRoberts.com)

- ❖ As promised more free stuff for your class.
  - ❖ A great CPU installation Video by Intel.
  - ❖ Another 20 question CompTIA A+ Essentials (220-601) pop quiz.
  - ❖ PART III: CompTIA Network+ study guide and practice test.
- 

### Install a Boxed Core 2 Extreme Processor Video

How about a free video demonstrating how to install a boxed Intel Core 2 Extreme Processor in the socket 775 and heat sink fan assembly. Intel has a really neat video free for download which would make a perfect classroom video when covering CPUs. Simply click on the link below and then select your language and resolution preference.

### Another 20 question CompTIA A+ Essentials (220-601) pop quiz

This is the third quiz in the series. Please feel free to send me feedback on the quiz especially about possible errors or those pesky typos. [Link Here](#)

### PART III: CompTIA Network+ study guide and practice test

This is the third in the Network+ certification series based on the CompTIA Network+ domain 3 test objectives. Your students should use the study guide to make notes and prepare for the practice test. This exam should take no more than 20 minutes. A score of 70 percent or 15 correct out of 21 will indicate that the student is prepared for the Network+ examination. As always, please feel free to send me feedback on the study guide and test questions with an email to [Richard@RMRoberts.com](mailto:Richard@RMRoberts.com).

## Electricity and Electronics

The 10<sup>th</sup> edition of Electricity and electronics is in the Goodheart-Willcox warehouse (g-w.com) and ready for your fall classes. A new supplement has been created to help you with your lab activities. A lab book designed to be used with National Instruments Lab View MultiSim will be ready in time for your fall classes.
